Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30 day MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.138(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 18, drawn to a jump takeoff position indicator system and method comprising an infrared light beam emitting device, an infrared light beam detecting device, a collimating means, a synchronization means, a display means, a memory for storing the status of said plurality of infrared light beams at the moment of takeoff, and a recall switch for recalling and displaying said status on said display means, classified in class 356, subclass 614.
- II. Claims 7-17, drawn to a jump takeoff position indicator system having an infrared light beam emitting device is an electronic assembly containing a plurality of infrared LEDS spaced at predetermined intervals with at least microcontroller for controlling the operation of said plurality of infrared LEDS, wherein said infrared light beam emitting device is powered by a battery in a housing and wherein low battery detection is provided and said housing provided with a plurality of alignment marks for visual alignment of said emitting device with said detecting device, classified in class 356, subclass 226.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does

not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination requires an infrared light beam emitting device is an electronic assembly containing a plurality of infrared LEDS spaced at predetermined intervals with at least microcontroller for controlling the operation of said plurality of infrared LEDS, wherein said infrared light beam emitting device is powered by a battery in a housing and wherein low battery detection is provided and said housing provided with a plurality of alignment marks for visual alignment of said emitting device with said detecting device not required by the combination. The subcombination has separate utility such as in a system which does requires the particulars of the combination (e. g. a memory for storing the status of said plurality of infrared light beams at the moment of takeoff, and a recall switch for recalling and displaying said status on said display means).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/789,146
Art Unit: 2877

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sang Nguyen whose telephone number is (571) 272-2425. The examiner can normally be reached on 9:30 am to 7:00 pm.
